

STAGE 1

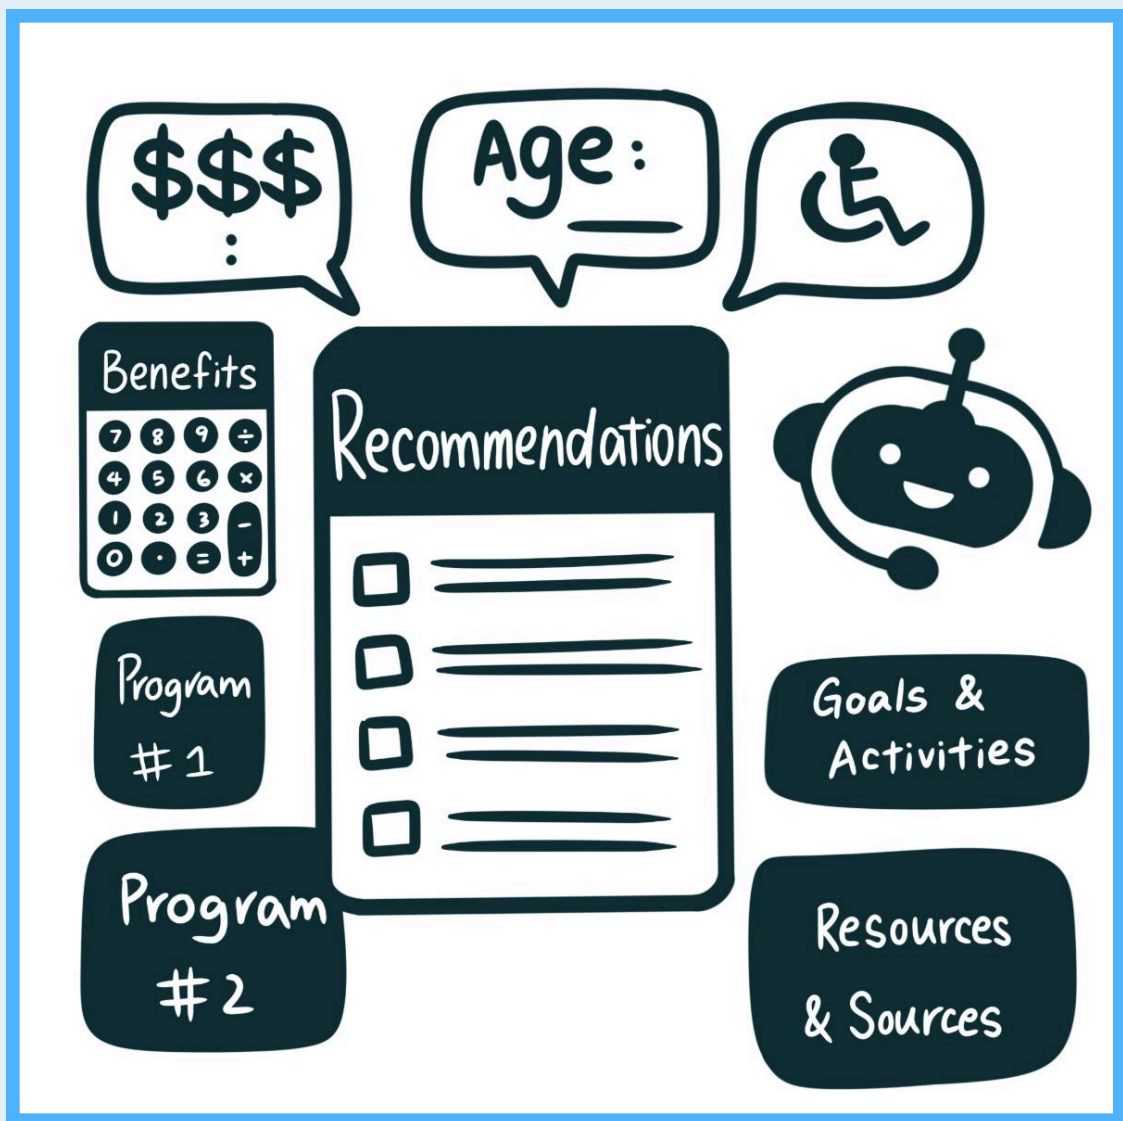

What Does The LLM Tool Do

During peer sessions, Alex (a peer specialist) struggles to provide timely support and locate relevant resources or benefit programs for Sam (a service user).

A new LLM-powered chatbot helps Alex gather key information during their conversations with Sam.

The LLM tool organizes key information and offers personalized recommendations for wellness goals, resources, and benefit program eligibility.

What (1) **opportunities**, (2) **risks** do you see in using the LLM tool in your peer support sessions? How do you think we can (3) **reduce the risks** of the LLM tool at this stage?
